

Everbridge Control Center

Everbridge Control Center is a comprehensive safety and physical security management solution designed to unify security systems, streamline incident response, and enhance resilience. It delivers real-time insights, automated workflows, and dynamic dashboards to empower proactive decision-making. From critical event management to advanced automation, it ensures operational control, minimizes risks, and protects people and assets during critical events.

Integrated platform for seamless safety and physical security management

By integrating diverse technologies, such as access control, video surveillance, and threat detection, into a single intelligent interface, Everbridge Control Center enables security teams to detect, assess, and respond to incidents faster and with greater accuracy. Its automation capabilities not only reduce manual effort and response time but also enhance situational awareness, ensuring a unified, scalable approach to managing risks across complex environments.

Key benefits

- **Know:** Gain real-time visibility and insights into safety and security risks, empowering your teams to identify and address internal threats proactively.
- **Respond:** Streamline critical event responses with automated workflows and actionable alerts, reducing reaction time, minimizing disruptions, and ensuring compliance with operating procedures.
- **Improve:** Continuously enhance operational efficiency through dynamic dashboards and data-driven reporting, enabling smarter decisions and long-term resilience.

Key features and outcomes:

- **System integration:** Seamlessly connects diverse safety and security systems into a unified platform, providing a holistic view of operations.
Outcome: Eliminates silos and enhances collaboration across teams.
- **Real-time insights:** Delivers dynamic dashboards and actionable alerts for instant decision-making.
Outcome: Empowers teams with visibility into risks and better situational awareness.
- **Automated workflows:** Streamlines responses with pre-configured, consistent actions to manage critical events effectively.
Outcome: Reduces reaction time, minimizes disruptions, and lowers human error.
- **Device activation and reporting:** Ensures operational readiness by facilitating timely device control and offering comprehensive analytics.
Outcome: Maintains operational control and drives insights for continuous improvement.
- **Critical event management (CEM) integration:** Extends communication capabilities, allowing rapid information sharing with relevant stakeholders.
Outcome: Enhances organizational resilience and ensures quicker recovery during crises.
- **Mobile App:** Enhances security operations by extending response capabilities beyond the Control Room. Equips responders with real-time access to the latest alarms, along with the tools to update and resolve them on the go.
Outcome: Accelerates response times, actionable real-time intelligence, and a lighter workload for the Control Room.

What makes Control Center different?

- **Seamless integration:** Unifies diverse systems for a holistic operational view.
- **Actionable intelligence:** Provides real-time insights to drive proactive decision-making.
- **Advanced automation:** Ensures swift, consistent responses while minimizing errors.
- **Enhances resilience with CEM connectivity and Purpose-built AI:** Leverages our High Velocity Critical Event Management (CEM) platform to streamline communication during crises.
- **Dynamic reporting:** Enhances operational effectiveness with data-driven insights.

"We've saved USD 6.7M over three years by eliminating the need to replace existing systems."

- US Government agency
