

Build enterprise resilience with Everbridge smart security

Simplify integration. Automate response. Take control of security.

Unify risk intelligence, physical security, and critical communications

For many organizations, keeping people safe and assets secure can be a daunting task. Threats are increasing. Risks are becoming more diverse. Operations also continue to grow, involving more systems, data, and users. All of this can be difficult to manage, and costly to control.

When a critical event unfolds and information floods into your organization, orchestrating an effective response to maintain the safety and security of your people and facilities is of utmost importance. Security professionals need a way to effectively centralize intelligence and rapidly disperse targeted information to protect people, facilities, and assets while ensuring operational resilience.

Be prepared to rapidly respond to any threat

- Integrate thousands of systems, devices, and sensors through over 250 field-proven connectors.
- Future-proof security investments with an open integration framework where new connectors can be added or upgraded any time without system downtime.
- Easily configure which types of threats matter the most to you with customizable filtering.
- Decide how to respond with a visual workflow editor that allows playbooks to be created and managed without needing to write a single line of code.
- Enable users to get the right view, at the right time, per your organizations' own requirements with a flexible user-interface designer.

"The Everbridge solution enabled a reduction on 3rd party guard spend by approximately 25% due to consolidation of monitoring and allowed for a reduction in monitoring points by 75%."

Enhance situational awareness and security automation

Everbridge smart security correlates events from disparate safety and security systems into a common operating picture to focus people's attention on what really matters. This internal threat view is combined with Everbridge's leading threat intelligence to provide a unified view of threats from both inside and outside your organization.

The platform provides users with actionable alerts, next step actions, and automated reporting to better manage risks, ensure compliance with operating procedures, and support business continuity.

Automated workflows ensure rapid, consistent responses, reducing the risk of human error. Automation also facilitates device activation to ensure you are always in operational control and protecting your people, even if nobody is watching.

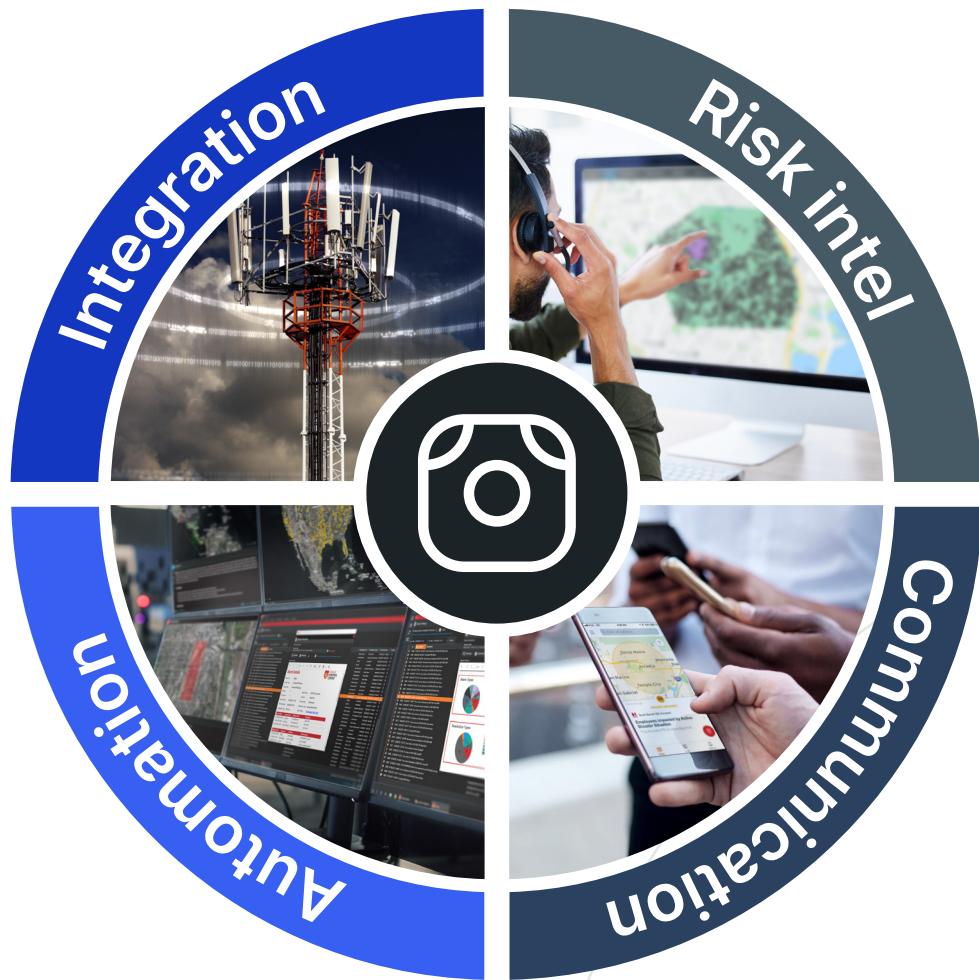

Dynamic reports and dashboards provide real-time actionable insights for your operations teams and senior executives.

Efficiently and effectively alert stakeholders

Everbridge smart security enables organizations to prepare for potential risk with proactive, engaging communications. And when a critical event happens, it is not enough to simply know about it. You need to communicate quickly and reliably.

The platform enables you to connect and inform your entire organization via virtually any communication device – within seconds. Facilitate two-way communication and mobilize your response team with message delivery confirmation and real-time insights. Know your people are safe and your operations, supply chains, and brand reputation are protected.

With Everbridge smart security, your organization can be safe, secure, and always in operational control. Now and in the future.

About Everbridge

Everbridge, Inc. (NASDAQ: EVBG) empowers enterprises and government organizations to anticipate, mitigate, respond to, and recover stronger from critical events. In today's unpredictable world, resilient organizations minimize impact to people and operations, absorb stress, and return to productivity faster when deploying critical event management (CEM) technology. Everbridge digitizes organizational resilience by combining intelligent automation with the industry's most comprehensive risk data to Keep People Safe and Organizations Running™.
