everbridge™

Securing K-12 schools with the Everbridge school safety platform
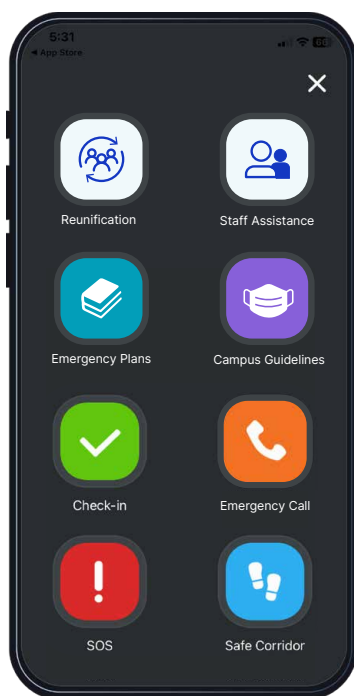

Protecting students, staff, and faculty in any crisis situation

The Everbridge school safety platform provides public safety-grade software applications to accelerate response times and coordinate efforts to address crisis situations affecting K-12 schools and districts. Orchestrate a collaborative approach for incidents like campus violence, medical emergencies, or lockdowns.

According to the FBI, the average duration of an active shooter incident is 12.5 minutes with a majority of them lasting five minutes or less. With only seconds to spare, K-12 school admins can't lose time to uncertainty or indecisiveness when it comes to responding to active shooter incidents. Everbridge offers solutions to address these events with a coordinated response that includes all appropriate personnel on campus and in the district to help get first responders to the scene faster.

- **SOS button** – Directly trigger a call to 911 with an audio stream.

- **Information and instructions** - Messaging templates execute emergency procedures and notify all impacted people of what is happening, and what to do. This includes, teachers, first responders, and parents.

- **Anonymous reporting** - Tips with photos and videos can be sent anonymously to avert issues of violence or bullying on campus, empowering everyone to speak up.

- **Safety status check-ins** - Two-way communication can be employed throughout the event alleviating concerns of when help is arriving.

When seconds matter, schools can rely on Everbridge as their trusted partner in school safety.

The Everbridge school safety platform quickly orchestrates critical processes during an emergency, including:

- Integrating with physical and digital panic buttons

- Automating school lockdown procedures

- Equipping school security and law enforcement with valuable insight of the situation

- Engaging school and district leadership with one touch conference calling

- Empowering and instructing teachers

- Facilitating communication feedback loops

- Informing teachers, first responders, parents, and other schools

- Analyzing data after the incident for improvement planning

- Everbridge provides an Alyssa's Law compliant solution

- 99.99% uptime

- Multi-lingual messaging
