

The Everbridge Personal Safety Device

A wearable safety solution for immediate access to help during emergencies.

Arm employees with the help they need, when they need it

The Bureau of Labor Statistics (BLS) reports that in the United States, thousands of workplace injuries and fatalities occur each year. Personal safety devices can play a crucial role in preventing or mitigating the impact of such incidents, and reduce the cost associated with these events.

The Everbridge Personal Safety Device is an innovative, wearable safety solution designed to provide individuals with immediate access to help in emergency situations. Leveraging Everbridge's industry-leading critical event management technology, this device ensures that users can quickly and efficiently communicate with emergency services, colleagues, or family members when in need.

A safe working environment contributes to higher productivity and positive employee morale.

Enhance employee safety and reduce cost with Everbridge

Personal Safety Device (PSD) wearables are innovating workforce safety, on site or in the field. With Everbridge, workers can do their jobs safely, knowing that no matter where they are, help is there.

- Track employees at remote locations
- SOS-button alerts admins if help is needed
- Fall detection alerts help when worker cannot
- Allows employee tracking underground
- Customized zone alerts for dangerous areas

The Everbridge Personal Safety Device

Usage scenarios:

- **Lone workers:** Provides an extra layer of safety for individuals in construction, utilities, or manufacturing working in isolation or in high-risk areas.
- **Travel safety:** A valuable tool for travelers in unfamiliar or potentially unsafe locations.
- **Healthcare employees:** Ensures those working in hospitals can quickly and effectively communicate instances of workplace violence.

Features and benefits:

- **One-Click SOS button:** Instantly send an alert with your location to emergency responders or predefined contacts.
- **Real-time location tracking:** Utilize GPS technology to allow designated contacts or emergency services to find you quickly.
- **Fall detection:** Automatically detects falls and sends an alert if the user is unable to respond within a set timeframe.
- **Geofencing alerts:** Receive notifications when entering or leaving predefined geographical areas for enhanced personal security.
- **24/7 monitoring service:** Optional subscription service for round-the-clock monitoring and emergency response coordination.

- **Durability:** Water-resistant and designed to withstand impacts, ensuring functionality in various environments.
- **Long battery life:** Designed for extended use with up to 7 days of battery life on a single charge.

Technical specifications:

- **Connectivity:** LTE, Wi-Fi, and Bluetooth
- **GPS:** High-sensitivity receiver with GLONASS support
- **Battery:** Rechargeable lithium-ion
- **Dimensions:** 55mm x 70mm x 15mm
- **Weight:** 55 grams
- **Waterproof rating:** IP67

Support and Services:

- Comprehensive user manual and quick start guide
- 24/7 customer support via phone, email, and chat
- Access to the Everbridge Safety Connection platform for managing contacts, alerts, and device settings
- Regular firmware updates to enhance functionality and security

Ensure regulatory compliance and lowered insurance

Adherence to safety regulations and standards is crucial for businesses. Failure to comply with safety regulations can result in fines and legal consequences. The use of personal safety devices is often a key component of regulatory compliance, which Everbridge can help organizations achieve.

Additionally, companies with a higher number of workplace accidents and injuries may face increased insurance premiums. The implementation of effective personal safety measures can help lower the number of claims and subsequently reduce insurance costs.
