

Everbridge 360™ Enterprise

Everbridge 360 is a critical event management platform that strengthens resilience by equipping organizations to detect threats earlier, respond rapidly, and continuously improve. The Enterprise version of Everbridge 360 provides the most advanced features, such as cutting-edge analytics, enhanced automation, and exceptional scalability. This comprehensive solution is designed to support large-scale operations, ensuring efficient responses and deeper insights into risks while maintaining seamless functionality for organizations with expansive needs.

Unified critical event management for resilience and rapid recovery

Everbridge 360 Enterprise integrates mass notification, risk intelligence, advanced analytics, and crisis management into a unified platform. Designed for global organizations, it helps protect people, ensure operational continuity, and minimize downtime during critical events. By providing real-time risk insights, automating communications, and enabling seamless team collaboration, it empowers users to make informed decisions, safeguard employees, and recover swiftly from disruptions, creating a more resilient and efficient organization.

Key benefits

- Enhance resilience with automated communications and real-time risk insights for quick decisions.
- Streamline crisis response via a unified platform combining notifications, analytics, and task management.
- Boost workforce safety by tracking incidents and employee locations to deliver timely alerts globally.

Know earlier, respond faster, and improve continuously in how you deal with threats

Key features and outcomes

- **Mass notification:** delivers instant, targeted alerts to employees using geolocation, HR, or travel data, ensuring the right information reaches the right people.
Outcome: enhances communication speed and accuracy during emergencies.
- **Risk intelligence:** provides real-time global threat monitoring through curated intelligence feeds and instant alerts for nearby dangers.
Outcome: proactively mitigates risks, keeping individuals and assets safe.
- **Advanced analytics:** offers incident pattern analysis, detailed reports, and after-action reviews to refine crisis responses.
Outcome: drives ongoing improvement in risk management strategies.
- **Crisis management:** centralizes crisis coordination with dynamic task assignments and executive dashboards for informed decision-making.
Outcome: streamlines responses and improves operational efficiency.
- **Dynamic workforce protection:** Aggregates and updates employee locations from multiple sources to ensure timely assistance.
Outcome: safeguards employees no matter where they are, building confidence and security within the organization.

What makes Everbridge 360 Enterprise different?

- **Mass notification:** deliver critical updates globally with 24/7/365 coverage.
- **Risk intelligence:** act on real-time threats with curated monitoring.
- **Advanced analytics:** drive improvements via deep insights and reporting.
- **Crisis management:** streamline responses with unified tools and dashboards.
- **Workforce resilience:** ensure safety with real-time location updates and automated collaboration

"We have revolutionized our management of critical events with Everbridge 360 Enterprise, achieving 99% staff reach, using automated alerts, real-time intelligence, and streamlined processes to protect 46,000 employees across 145 countries during crises." - **Adam Barrett**, Resilience Director at Dentsu
