

# Supply Chain Module

The Everbridge Supply Chain Module provides real-time visibility, proactive risk intelligence, and advanced tools to manage disruptions. It enables organizations to enhance operational efficiency, reduce downtime, and strengthen resilience in today's complex, high-risk supply chain landscape. As the risk zone expands—and the frequency and severity of critical events increase—boardroom priorities are being reshaped, and operational continuity is increasingly under threat.

## Proactive solutions for supply chain resilience

Tailored for businesses, it minimizes risks, ensures operational continuity, and enhances decision-making. With powerful visualization, early alerts, and seamless integration, it transforms potential threats into manageable challenges, empowering organizations to maintain efficiency and resilience in even the most complex supply chain environments.

### Key benefits

- **Know:** Gain real-time visibility across your supply chain with seamless integration of risk data, enabling you to stay informed about potential disruptions before they escalate.
- **Respond:** Act swiftly with proactive alerts and tools to address challenges, minimizing downtime and operational inefficiencies during critical events.
- **Improve:** Continuously enhance supply chain resilience by analyzing historical data and trends, turning insights into actionable strategies for long-term efficiency and reliability.

## Key features and outcomes:

- **Feature:** Real-time visibility with integrated risk data.  
**Benefit:** Access accurate, turn-by-turn insights on routes and suppliers.  
**Outcome:** Stay informed and adapt to potential disruptions early.
- **Feature:** Proactive alerts for critical events.  
**Benefit:** Receive advanced warnings about weather, traffic, or geopolitical risks.  
**Outcome:** Minimize downtime and prevent costly delays.
- **Feature:** Seamless integration with existing systems.  
**Benefit:** Consolidate data from your TMS and other sources into one platform.  
**Outcome:** Streamline operations, saving time and reducing complexity.
- **Feature:** Detailed context for threat assessment.  
**Benefit:** Leverage insights like traffic cameras, ports, and shipping lanes.  
**Outcome:** Make more informed, strategic decisions to protect your supply chain.
- **Feature:** Tools for historical data analysis.  
**Benefit:** Identify trends and areas for improvement.  
**Outcome:** Continuously enhance efficiency and resilience across operations.

## What makes Everbridge Supply Chain Module different?

- Provides real-time risk insights into global and local threats.
- Seamlessly integrates with existing systems, centralizing critical data.
- Delivers proactive alerts and solutions to minimize disruptions.
- Offers enriched contextual data for smarter, more strategic decisions.
- Powered by Purpose-built AI and the Everbridge High Velocity CEM™ platform, it enables faster responses.
