

Everbridge Response Management

Orchestrate your entire incident response from one unified platform

Everbridge Response Management is a unified incident response solution that helps organizations coordinate actions, communicate seamlessly, and maintain control during disruptions.

Powered by Everbridge 360™, our High Velocity Critical Event Management™ platform with Purpose-built AI, it enhances situational awareness and standardizes response protocols. This allows for faster, more confident decision-making, which in turn accelerates recovery and strengthens overall enterprise resilience.

Essential incident response platform for resilient organizations

Everbridge Response Management enables organizations to move from detection to coordinated response with speed and precision. By centralizing workflows, communication, and decision-making, teams can manage incidents effectively while maintaining operational continuity.

Designed for scalability across industries, the platform ensures that response teams, executives, and stakeholders stay aligned with real-time visibility into incidents, actions, and outcomes.

Key benefits

- **Know** sooner with real-time dashboards for confident decision-making.
- **Respond** faster using automated workflows for coordinated action.
- **Improve** continuously with standardized processes and auditable logs.

Drive faster response and stronger resilience across every incident

Key features and outcomes

- **Automated workflows:** Streamlines response with consistent, pre-configured actions for incidents of any size.
Outcome: Faster response, fewer disruptions, reduced human error.
- **Real-time insights:** Provides live dashboards, trackers, and updates for clear visibility into incidents.
Outcome: Better awareness, faster, more informed decisions.
- **Document repository:** Converts static plans into assignable, actionable tasks for teams and individuals.
Outcome: Stronger collaboration and accountability.
- **Critical Event Management (CEM) integration:** Integrates seamlessly with Everbridge CEM to rapidly communicate critical information to stakeholders.
Outcome: Drives faster response, stronger resilience, and quicker recovery.
- **Mobile app:** Empowers teams to mobilize, execute plans, and collaborate from anywhere.
Outcome: Accelerates response time and improves coordination.
- **Collaboration channels:** Extends collaboration to stakeholders outside the platform, enabling real-time contribution to mitigation efforts.
Outcome: Keeps stakeholders informed and minimizes communication delays.

What makes Everbridge Response Management different?

- **Unified response and communication**
Orchestrates all incident response activities, teams, resources, and communications from a single platform, eliminating silos and improving coordination.
- **Seamless workflow automation**
Standardizes response processes with automated workflows that ensure rapid, consistent execution while minimizing errors.
- **Executive view and reporting**
Delivers real-time dashboards and situation reports that enable leadership to monitor progress and make strategic decisions without interrupting response efforts.
- **Exercise mode**
Enables realistic simulations to test response strategies and improve readiness—without triggering real-world consequences.

“Response Management has become the main framework of our global policy, and today we are able to audit and do follow up on all our different crisis management teams from our mission center at HQ.”

Sandvik Coromant, Global Tooling Solutions
