

Everbridge Insurance Services

A parametric weather insurance solution designed to protect people, operations, and business continuity.

Everbridge Insurance Services delivers a parametric weather insurance solution embedded within Everbridge 360™, linking response plans, weather intelligence, and financial protection so organizations can act immediately when severe weather strikes. Protect people, safeguard operations, and ensure business continuity with automatic funding triggered by predefined weather conditions, all as part of a comprehensive critical event management solution.

From weather risk to funded response

Everbridge Insurance Services connects severe weather intelligence directly to financial protection and operational playbooks. When agreed weather thresholds are met, funding is automatically released, enabling teams to execute emergency actions and continuity plans without waiting for claims approvals, budget sign-offs, or manual escalation.

By embedding predefined weather-triggered insurance within Everbridge 360, organizations eliminate friction between risk, finance, and operations, ensuring resilience is both operationally ready and financially backed.

Key benefits

- **Know your weather risk exposure:** Gain visibility into how severe weather may impact critical assets and operations across your organization.
- **Respond with speed and certainty:** When predefined severe weather thresholds are met, funding is automatically released, enabling teams to activate operational plans immediately and respond with confidence.
- **Improve resilience outcomes:** Reduce downtime, protect people, and strengthen financial continuity.

Key features and outcomes:

- **Event-triggered funding embedded in Everbridge 360:** Automatically alerts when agreed wind, precipitation, and/or temperature thresholds, tied to operational disruption points, are met.
Outcome: Ensures objective, real-time activation of both response plans and funding without manual review or delay.
- **Automatic funding release:** When predefined weather conditions are met, payout is triggered immediately with no claims processing or budget approvals required.
Outcome: Eliminates financial bottlenecks so teams can act decisively when every minute matters.
- **Operational and financial workflow linkage:** Connects emergency playbooks, continuity plans, and insurance funding in one automated workflow.
Outcome: Removes friction between risk, finance, and operations teams, accelerating coordinated response.
- **Funding aligned to real disruption thresholds:** Coverage amounts are structured around actual evacuation, sheltering, transportation, and continuity requirements.
Outcome: Ensures response actions are fully funded and executable, not just planned.

What makes Everbridge Insurance Services different?

- Links operational triggers to financial payout in one automated workflow.
- Designed around real disruption thresholds tied to customer playbooks.
- Eliminates the gap between identifying risk and funding response.

With Everbridge Insurance Services, severe weather intelligence, operational response plans, and financial protection are unified in one automated workflow. When predefined weather thresholds are reached, teams can activate response actions and unlock funding simultaneously, to eliminate delays, and reduce downtime.
