

CAMPUS CRITICAL EVENT MANAGEMENT

ABOUT EVERBRIDGE

We provide enterprise software applications to improve campus response for critical events to **keep students, faculty, staff, and visitors safe, while keeping the college or university running.**

During public safety threats such as active shooters, terrorist attacks or severe weather conditions, as well as critical business events such as IT outages or cyberattacks, our SaaS-based platform enables our customers to quickly and reliably deliver location aware and contextual messages to, and receive verification of delivery from, tens, hundreds or millions of recipients, across multiple communications modalities such as voice, SMS and e-mail.

COMPANY PROFILE

- + **Over 4,200 Global Customers**
 - + Over 225 Education Institutions
- + **199 Million Contact Profiles and Connections**
- + **Access to 100+ Communication Devices**
- + **Over 2 Billion Messages Delivered in 2017**
- + **500+ Global Employees**
- + **99.99% Uptime**

ONE PLATFORM FOR:

CLERY ACT COMPLIANCE

Stay compliant with the ability to share timely warnings and deliver emergency notifications to your entire campus via multi-modal notification and reporting capabilities.

STUDENT SAFETY

Ensure when students feel threatened they have a mobile SOS button to quickly deliver vital information to authorities including location, audio and video via a mobile app.

CAMPUS POLICING

Deliver campus wide notifications regarding criminal activity, safety tips, event updates and more to keep students and staff safe and informed.

ACTIVE SHOOTER

Alert surrounding areas of incidents while sending precise, location-based notifications to affected areas.

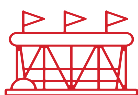

SEVERE WEATHER

Keep your campus populations ahead of the weather by informing them of tornados, wild fires, blizzards and other severe storms in addition to any building and/or campus closures.

IT INCIDENTS

Mitigate the impact of campus system downtime that can affect your library Wi-Fi, student records, HR database and other systems by minimizing how long it takes to activate IT response teams.

MAJOR SOCIAL AND ATHLETIC EVENTS

Reach spectators, students, vendors, staff and nearby communities via SMS through a simple event text opt-in.

Ronald M. Quagliani

ASSOCIATE VICE PRESIDENT
OF PUBLIC SAFETY &
ADMINISTRATIVE SERVICES,
UNIVERSITY OF NEW HAVEN

“The initial message went out from my cell phone minutes after I received the call of the potential threat to the campus. I wouldn’t have been able to do that with any other product. It really reinforced why I chose a school alert system from Everbridge.”

Lynn B. Daley

DIRECTOR OF BUSINESS
CONTINUITY, ROCHESTER
INSTITUTE OF TECHNOLOGY

“During our test last year (in September), it took less than 30 seconds to log in, select a message and dispatch that message. Within 20 seconds all devices had been activated using one interface (in that case it was, Alertus). This integration means that public safety doesn’t have to take any time to think about what system is used for what, then log into one and send, then log into another and send. It’s all in one place, with one send, for all devices.”

Director for IT System Support

A LEADING PRIVATE RESEARCH
UNIVERSITY

“Using IT Alerting has made it a lot more efficient for our NOC when responding to IT incidents. The group no longer has to search offline for on-call schedules and contact information and can easily escalate communications to the right staff, at the right time. This ensures our staff are collaborating on a conference bridge to triage the issues at hand.”
