

Everbridge Risk Center For Critical Event Management

Risk Center

Risk Center combines thousands of the most trustworthy data sources with an experienced team of analysts to empower organizations to proactively monitor and mitigate risk. Built on the Visual Command Center platform, the solution provides powerful visualization and orchestration for managing critical events used in organizational functions such as security, business continuity, supply chain and operations to mitigate or eliminate the impact of risk.

Through targeted real-time alerting, organizations can proactively monitor and analyze domestic or worldwide incidents and events, dramatically increasing the ability to respond to risks that threaten people and organizations – locally and globally. Risk Center improves overall situational awareness, sends targeted high-value alerts, and helps to keep people safe and businesses running.

One Common Operating Platform

Powered by the Risk Intelligence Monitoring Center (RIMC), which is a further expansion of the NC4 monitoring centers acquired by Everbridge, Risk Center has a reputation for providing the highest quality predictive risk intelligence and early warning of incidents and events. It also includes standard templates for sending communications to those who need to know when minutes and seconds count. Customers obtain access to the best risk intelligence data in Risk Center and have a seamless upgrade path to Visual Command Center and the powerful Critical Event Management platform as requirements grow.

- + Keep Employees Safe
- + Enhance Situational Awareness
- + Ensure Business Continuity
- + Protect People, Assets, and Infrastructure
- + Satisfy Duty of Care

Hyper-Local Intelligence

Risk Center delivers the most comprehensive hyper-local risk intelligence to empower organizations with a common view to more effectively manage events that threaten critical infrastructure, physical assets, supply chains, and employees.

Risk Center displays all reported risk events but alerts you only to relevant risks. Determine the risk sources you want to track from an extensive list. Identify the assets you want to monitor and receive alerts when a risk is detected near your assets.

Vetted, customized, hyper-local data is essential to proactive risk management. Risk Center's alerting capabilities provide details on even small-scale events with the potential to impact your organization while filtering out the noise that might otherwise obscure them.

Actionable Insights

Risk Center offers contextual data layers that can help you shape an appropriate response based on real-time conditions. Gain actionable insight into current weather conditions, traffic flow, pandemic events and more.

Gain quicker understanding of who and what is at risk. Select an alert and Risk Center displays the details, including a list of potentially affected assets.

Effective Communication

Communicate with persons at risk, responders, stakeholders, and those on a need-to-know basis using pre-defined communications templates.

Secure and Scalable

Risk Center is an entry into the Everbridge Critical Event Management Platform, a global SaaS solution that helps customers keep people safe and businesses running. Some of the benefits customers enjoy include:

- + **No on-premise infrastructure or servers to support and maintain.**
- + **ISO 27001, SOC2 and GDPR-compliant, adhering to the highest security and privacy regulations applicable to global software solutions.**
- + **Scalable to hundreds of thousands of assets and millions of contacts per customer. Grow with your organization without worrying about limits.**
