

Keeping People Safe
and Organizations
Running. *Faster.*

Founded in 2002, in the aftermath of 9/11, Everbridge, Inc. (NASDAQ: EVBG) is the global software leader in Critical Event Management (CEM) and national Public Warning solutions. We provide enterprise-grade software-as-a-service applications that automate and accelerate organizations' operational response to critical events to Keep People Safe and Organizations Running™. Over 6,300 customers around the globe rely on Everbridge's Critical Event Management platform.

Our mission-driven team of over 1,900 employees, share a common vision of protecting what matters most to our customers. Our collective experience across a range of industries enables the way we design, implement and support resiliency solutions that makes a real difference to organizations and communities, while saving lives.

What we do

For two decades we have partnered with our customers and grown our software and service capabilities to meet their needs. Today, we provide a single unified platform that allows organizations to manage the full lifecycle of a critical event –configured to mitigate risks to:

- + people
- + technology
- + physical assets
- + digital operations

Everbridge enables organizations to **anticipate and assess** the most relevant **disruptions** to their operations and communities and **mitigate or eliminate the impact** with an **integrated, end-to-end solution**, and **24x7x365 customer support**.

**6,300 customers
rely on Everbridge**

— during public safety threats such as active shooter situations, terrorist attacks, natural disasters or severe weather conditions, as well as critical business events such as IT outages, cyber-attacks, product recalls, workplace violence incidents, or supply-chain interruptions.

Everbridge solutions help keep people safe and operations running, with benefits that include improving ROI, reducing costs, improving customer experience, and promoting staff retention.

We quickly and reliably

- + Aggregate and **assess** threat data and determine which are relevant to your assets and people
- + **Locate** people, or at-risk employees, irrespective of location, as well as responders, who are near or traveling to areas of risk and are able to assist
- + **Act** to automate standard operating procedures to launch and manage incident response
- + Track and **analyze** progress and performance on executing response plans and to identify bottlenecks and improve the response for subsequent events

The Everbridge platform leverages tens of thousands of continually updated risk data elements – easily accessible and visualized via a “single pane of glass” – combined with machine learning, automation, and controls.

Our critical event management (resilience) solutions

Everbridge understands the range of threats faced by organizations and communities and how critical it is to adapt within this volatile global threat landscape.

We specialize in five core resilience solutions to meet these needs

BUSINESS OPERATIONS

Heads of business continuity, operations and risk management can protect facilities and avoid operational disruption, while safeguarding vital assets and revenue.

DIGITAL OPERATIONS

IT and DevOps professionals can automate and streamline digital service and incident management to accelerate operations and deliver continuous service uptime.

PEOPLE RESILIENCE

Human resources, business continuity, and security professionals can fulfill their duty of care by protecting employees from potential critical events wherever they work or travel around the globe.

PUBLIC SAFETY

Public authorities can quickly assess critical events, alert populations, mobilize available resources, and coordinate across multiple agencies to keep people safe anywhere in the world.

SMART SECURITY

Security leaders can integrate physical security systems and unify with risk intelligence and critical communications, to prepare for – and rapidly orchestrate response to – threats to their people and assets.
