

Organisational Resilience Roadshow

Hosted by Everbridge, Atos Unify, and PwC

Businesses and communities are experiencing a growing number of disruptions from threats like severe weather, civil unrest, theft and vandalism, pandemics, and cyber-attacks. These disruptions have left many organizations concerned about risks to their people and operations. Building organisational resilience is key.

Everbridge, Atos Unify, and PricewaterhouseCoopers (PwC) have worked together to research resilience priorities and trends. Some highlights from this research revealed that despite the importance of resilience, most resilience decision makers spend less than 25% of their time building resilience at their companies, according to a recent survey conducted by Dr. Stefan Vieweg, a resilience expert and Director of the Institute for Compliance and Corporate Governance at the Rheinische Fachhochschule Cologne, Germany. Despite this limited time investment, almost 50% of the respondents felt at least moderately prepared to deal with threats. The lack of preparation had serious consequences. Respondents reported only being able to avert about 25% of the potential damage of threats they faced, resulting in the loss of up to 50% of sales and for most, weeks of downtime.

Roadshow events are scheduled in Q4'22 throughout Europe.

How we can help

Everbridge delivers a Critical Event Management (CEM) platform that increases resilience and minimizes the impact of major incidents by enabling organizations with the right technology to know about risks earlier, respond faster, and improve continuously. Everbridge goes to market with partners PwC and Atos Unify to complement our resilience solutions.

PwC Resilience Services & Everbridge Technology Solutions

Together, PwC and Everbridge combine world-class professional services, technology and global resources to enhance organizational resilience and reduce the impact of critical events.

World-class Expertise, Technology, and Global Resources

Everbridge CEM combined with digital workplace solutions for knowledge and frontline workers from Atos Unify are a powerful combination for businesses globally, ensuring that your duty of care obligations are covered for a holistic improvement to the employee experience.
