

SAFETY CONNECTION AND INTERNATIONAL SOS TRAVELTRACKER INTEGRATION

KEEP TRAVELERS SAFE

For many security and management teams it takes too long to gather data from multiple systems with often conflicting results to answer critical questions like:

Are my employees safe?

Which employees need help?

Who else from my company is headed to a potentially dangerous situation?

Then they might have to rely on different communications systems to reach employees who are in harm's way.

Everbridge and International SOS have partnered to make it faster and easier for organizations to ensure their local, remote and traveling employees are safe. The integration between Safety Connection and International SOS TravelTracker enables organizations to quickly locate employees based on their travel itineraries and reach them using the best available contact information.

KEY INTEGRATION BENEFITS

Use International SOS TravelTracker Itinerary (Air, Hotel, Rail, and Ferry) data within Everbridge Safety Connection to:

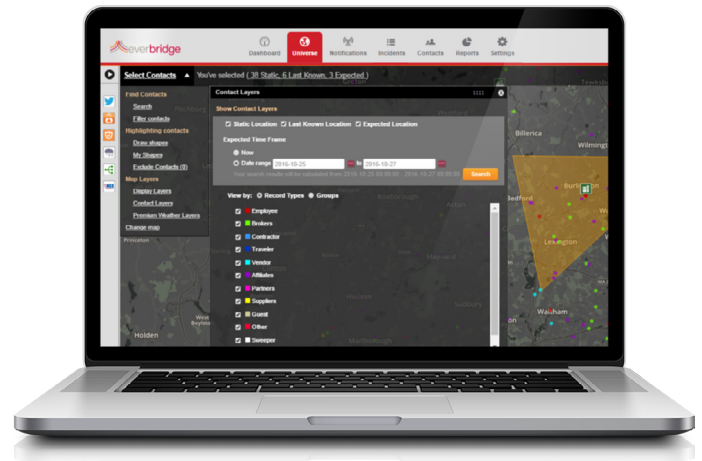

- + Contact all employees using either Everbridge Safety Connection or International SOS TravelTracker
- + Access the most accurate information on who is in or headed towards harm's way
- + Enrich employee contact data from travel itineraries and other location data to improve communication
- + Reach employees around the world using the most reliable global, local and mobile communications methods
